**DETAILED ACTION**

Acknowledgement is made of receipt and entry of the amendment filed on 09/13/2007.

Claims 1-3 and 5-20 will be examined on the merits.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 5-20 as amended still stand rejected under 35 USC 103(a) as being unpatentable over Kataoka et al. (US 6235331) and/or Granata (WO02/058793) in view of Chavali et al. (US 20010031275, DWPI Abstract), Maguire et al. (DWPI Abstract, 1995-054394), Chen et al. (US 20020156051, DWPI Abstract) and Wechter (US 6242479) for the reasons set forth in the previous office action.

Applicant's arguments have been carefully considered but are not deemed persuasive. Applicant argues Kataoka et al, Granata, Chavali, Maguire, Chen and Wechter do not teach or suggest the particular combination of ingredients because the combination of references suggest the particular combination of ingredients have greater than expected results as shown in Figure 1. Thus, an effect which is greater than the sum of each of the effects taken separately can be evidence of a greater than expected result. The disclosure of the present application sufficiently shows such unexpected results.

Although Applicant argues that the disclosure of the present application sufficiently shows such unexpected results, it appears to examiner that applicant has not claimed any specific effective amounts and/or ranges of active ingredients within its claimed composition to determine whether applicants' claimed composition invention demonstrates unexpected results and synergism. What specific effective amounts and/or ranges of active ingredients within applicants' claimed composition of claims 1-3 and 5-20 produce unexpected results and synergism?

**No claims are allowed.**

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
